

REVISIONS

REV.	DESCRIPTION	DATE	APPRVD.

Notes:

- To achieve the highest recovery, size the storage tank circulation pump for maximum capacity. See "Plumbing Applications" in the water heater installation manual.
- Thermostat of storage tank should be set 10°F below the output set temperature of Noritz heater.
- A System Controller can be used to connect up to 6, 12, or 24 multi-heaters. (12 and 24 unit System Controllers are mounted externally to the water heaters). Configure System Controller for "Storage Tank" mode, see system controller installation manual.
- When using a system controller, use only a single remote controller.
- Size the piping to allow for the maximum flow rates of the units.
